

Paul Hahn

Email: pbhahn@outlook.com | GitHub: github.com/Hahn814 | LinkedIn: linkedin.com/in/paul-hahn

Summary

Experienced Software Engineer specializing in scalable, cost-effective solutions. Proficient in Go, Python, Docker, AWS, and cloud-native architectures. Demonstrated success in delivering maintainable, secure, and high-impact software systems. Quick to adapt and master new technologies.

Skills

- Programming Languages: Go, Python, Kotlin, Java, Typescript, Bash
 - Frameworks: Django, Angular, LEMP stack
 - DevOps & Cloud: Docker, AWS, CI/CD, Linux, Infrastructure as Code
 - Data: PostgreSQL, Redis, ETL, NLP, Data Analysis
 - Practices: Modular architecture, secure coding, technical documentation, unit testing, agile methodologies, microservices, REST API, containerization, scalability, security
-

Education

California University of Pennsylvania

Bachelor of Science in Computer Science, May 2016

GPA: 3.37 (Major)

Experience

Advanced Software Development Engineer

Solventum – Remote / Sep 2016 – Present

- Developed secure ETL pipelines integrating support ticketing systems with production data sources, improving data accessibility and compliance.
- Designed and deployed centralized traffic broker using Go microservices and Redis, increasing system scalability and reliability.
- Packaged and published reusable Python modules to internal PyPI servers, reducing development time by 30%.
- Built and maintained scalable LEMP-stack platforms with logical replication, achieving 99.99% uptime.
- Created visualization tools for user editing trends and anomaly detection, enabling proactive issue resolution.
- Trained sentiment models to identify user frustration, reducing customer escalations by 15%.
- Maintained tooling for unstructured data analysis in NLP workflows, enhancing data insights.
- Led feature development, resolved bugs, and triaged issues across multiple production systems.

Web Development Consultant

Freelance – Remote / May 2015 – Sep 2025

- Developed and deployed custom web applications for small businesses using Python, Go, Django, Docker, and AWS.
- Implemented secure authentication and responsive design, improving user engagement.

Software Consultant

Parametric Technology Corporation – Uniontown, PA / May 2016 – Sep 2016

- Built Windchill feature enhancements and conducted client data migrations using Java and JSP.
- Authored technical documentation for internal and client use.

Computer Science & Math Tutor

California University of Pennsylvania – California, PA / Spring 2014 – Spring 2016

- Tutored students in Java, C++, C, and Algebra courses.
- Led group and individual study sessions.
